

# SURVEY ENGINEER

Having been recently awarded several key projects, NextGeo is once again expanding its team.

We are looking for an experienced Survey Engineer who will take ownership of the overall set up, integration, operation, and maintenance of all survey sensors, including mobilisations and demobilisations. You will provide ongoing support to the survey team to ensure continuous operations and quality data acquisition.

We offer exciting projects (primarily in the Mediterranean, Baltic and North Sea), an extremely accessible senior leadership team, excellent personal development opportunities, and a fun yet professional working environment.

**Posted:

**Closing:  
09/09/2022**

**Competitive salary  
based on 180  
offshore days per  
year**

---

Responsibilities will include:

- Actively participating in toolbox talks and risk assessments
- The installation, interfacing, testing, calibration, verification, and operation of hydrographic, geophysical and geotechnical survey equipment to the required standards and in accordance with client and company specification and procedures
- Recording and reporting vessel/ROV and sensor offsets
- Maintaining an accurate equipment register
- Checking, inspecting and documenting against manifest all equipment on receipt and dispatch from vessel
- Working with the survey team to deploy and recover survey sensors as required by the Survey Party Chief
- Working with the survey team to ensure the survey sensor data is acquired to project requirements
- The ongoing checking, fault finding and maintenance of the survey equipment on the vessel
- Documenting and reporting on faulty/damaged equipment in line with company procedures
- The technical support for survey sensors onboard vessel, liaising with shore side and 3rd party suppliers, as required
- Assisting the shoreside technical teams in reviewing and updating vessel procedures/forms and documentation as required

When applying, please demonstrate:

- Previous experience in a similar role
- BSc or HND in electronics or IT related discipline or relevant industry experience
- Proficiency in the setup and operation of commonly used survey equipment
- Experience in fault finding
- Ability to work flexibly in global locations
- Hold a valid Bosiet or equivalent
- Hold a valid OGUK medical
- Qualification in an appropriate survey related subject
- Appropriate field experience

To apply, please submit your CV to [recruitment@nextgeosolutions.com](mailto:recruitment@nextgeosolutions.com) using the subject heading: Survey Engineer 006/22
