

GEOTECHNICAL ENGINEER (OFFSHORE)

As NextGeo expands, our geotechnical offering is also on an impressive growth trajectory; therefore, we are looking to recruit an experienced Geotechnical Engineer [offshore]. You will join us at the beginning of our journey, meaning you can help us shape the future of NextGeo whilst gaining excellent personal growth opportunities.

We can offer exciting projects, an extremely accessible senior leadership team and a fun yet professional working environment. Our projects are primarily in the Mediterranean, Baltic, and North Sea.

We are looking for an autonomous, experienced, and professional Geotechnical Engineer who will take ownership of the project and act in the best interests of NextGeo. The successful candidate will be the key interface between the Geotechnical Operators/Driller and the Client/Party Chief. Through strong relationship building and accountability, you will take responsibility to ensure soil and rock acquisition and interpretation is to the highest standard and within client scope/expectations.

Responsibilities will include:

- Core penetration test interpretation
- Soil/rock logging
- Working knowledge and experience with Eurocode and British Standards
- Knowledge of lab testing equipment and processes
- Understanding of drilling equipment and CPT operations and principles
- Quality control of samples by junior members of staff
- You will be proficient with MS office packages and an intermediate/advanced user of Excel.
- Confidence with gINT software and QGIS is a plus.

We are a multinational organisation with different cultures and beliefs and team fit, as well as technical competence, is extremely important to us.

We will consider candidates from offshore and land-based backgrounds.
